

Trusted Network Certification

POLICIES & GUIDELINES

- We will comply with the “[Trusted Network Specifications](#) when connecting to Administrative Information Services through the High-Speed Data Backbone”.
- The Network Administrator will notify the Administrative Computing Security Officer when/if any changes are made to our network configuration which may compromise overall security. This includes changes in network operating system/platform.

NETWORK INFORMATION

TCP/IP Network Address Range _____

If you have certified a range of addresses, please check below to let us know how you would like these to be entered into the filter:

- Enter all addresses from range indicated above
- Certify the range indicated above, but enter individual addresses upon request

Entry of individual IP addresses or IP address ranges into the IP filter is at the discretion of the Network Administrator and Access Security Representative.
