

## TSM Authorization Form

Tivoli Storage Manager (TSM) is a service offered by Information Technology Services (ITS) for archiving and/or backing up disk files from any workstation or personal computer that is connected to the University's backbone network. In order to use this facility, you must have a valid ITS Charge Account and be registered in the ITS TSM database. Charges are calculated on the stored files in terms of megabytes per year. To register clients to use the TSM facility, complete this form and return it to the ITS Accounts Services Office in 204 Wagner Building, University Park. If you do not have an existing charge account, you may attach this form to the ITS For-Fee Services Request Form and submit both forms together. Please enter the node names to be backed up for each machine you plan to back up. If you have more than one machine, each one must be listed separately. Current rates and additional information can be found at: <http://ais.its.psu.edu/services/tsm/>

ITS Charge Account #:

Node Name(s) to be backed up (example: accounts.css.psu.edu):

\*If you would like to schedule an automatic backup, please email [backup@psu.edu](mailto:backup@psu.edu) with suggested backup times.
